Web Practices	Responsive Design, Mobile-First Development, Cross-Browser Compatibility, Performance Optimization, Clean Code Principles
Tools	Git, Trello

Professional Experience

Full Stack Developer — ManicMedia

June 2024 – Aug 2026

Coimbatore

- Developed and maintained end-to-end Laravel applications, handling both frontend and backend development, implementing role-based authentication (Admin and Customer modules), designing REST APIs, and managing databases using MySQL.
- Built and customized WordPress websites by developing and configuring plugins, customizing themes, adding new functionalities, performing updates, and maintaining content management features based on client requirements.
- Created and customized Shopify stores, implementing responsive frontend designs using Liquid templates, and developed backend APIs in Laravel for webhooks, order creation, product management, customer management, and order processing.

- Collaborated with cross-functional teams to gather requirements, deliver scalable web solutions, perform debugging and performance optimization, and ensure high-quality, user-friendly applications following industry best practices.

Development Projects

Business Management Web Application — Laravel, PHP

- Developed a business management system with authentication, data management, and reporting functionalities.

Corporate Website Development — WordPress

- Developed and deployed responsive corporate websites with custom themes, plugins, and bespoke functionality, ensuring optimized performance and user experience.

E-Commerce Website Customization — Shopify

- Customized Shopify themes and optimized user experience for online stores.
